- Facial Recognition:**
  - Recognition of individuals based on facial features, allowing for access control or identification of persons of interest.
- Activity Recognition:**
  - Recognition of patterns of activity, such as loitering, unusual movements, or predefined suspicious behaviours.
- Intrusion Detection:**
  - Detection of unauthorized access or entry into restricted areas, triggering alarms or alerts.
- Alert Generation:**
  - Automatic generation of alerts for various events, such as security breaches, suspicious activities, or the presence of specific objects.

**REFRAME**

### ...Customisable Alert Rules.

- Define monitored zones per camera
- Specify the objects you want to monitor
- Set daily "Arming" schedules per camera
- Share camera alerts with selected community groups

**REFRAME**

### ...Alert Centre

We offer AI systems at very affordable prices. Plus, we offer free maintenance, this comes with capability to flag the live notification from Telegram which will be installed in your app. Our Control Room are there to monitor the alerts and escalate whenever its required, 24/7.
